A Garden in your school in just 6 simple steps.

The goal is to have garden programs in schools. Teaching the next generation the values of gardening and growing their own food. Take gardening in schools to a new level with garden to table. What's grown in the garden can be used to harvest for the actual cafeteria food served to the children during nutrition and lunch. A School Bundle kit includes multiple beds and a free 95" arch trellis. Outside of the bundle kits all other products offered by Olle Gardens are 30% off.

Why Olle Gardens

- » Olle Gardens is one of the largest companies selling raised beds to schools.
- » Purchase Orders accepted. Once PO is received, we ship the next day. FREE SHIPPING
- » Olle Gardens are the strongest galvanized raised beds in the industry. built to last up to 20+ years, the steel panels are 0.6 mm in thickness.
- » Made of corrugated steel, our galvanized garden beds are safely protected against the weather by a special zinc-aluminum alloy, which makes the panels not hot to touch. Not to mention they are Eco-Friendly, being food grade safe.
- » Olle Garden raised beds have open bottom designs which improves drainage and promotes strong root development.
- » Olle Garden Beds come with a rubber safety strip to protect you from the sharp edges of the panels. Safe for children, elders, and pets.

Gardening Benefits for Children / Young Adults

Gardening can have many benefits for children & young adults, including:

Sense of accomplishment

Children can learn that their hard work pays off as they watch their plants grow from seedlings into flowers or food. This can boost their self-esteem, which can lead to them trying new things.

Improved mood

Studies show that children who have contact with soil while gardening, such as when digging or planting, can have better moods and decreased anxiety.

Physical development

Gardening involves a range of motor skills, from gross motor skills when carrying tools or watering plants to fine motor skills.

Sensory development

Children can feel different textures, such as soil, seeds, flowers, wood, and petals.

Learning experiences

Gardening can be a great way for children to learn through engaging their senses.

Healthy eating

Gardening can encourage children to enjoy the simple pleasures of growing something and discover the quality of fresh food

We Do Things Differently

Olle Garden Commitment

At Olle, we are committed to nurturing a passion for gardening and fostering a love for nature among young minds. As one of the largest companies offering school programs, we take pride in supporting schools to set up gardens for classes, programs, and club activities, providing a hands-on and interactive learning experience for students. Our goal is to empower educators and students alike by creating outdoor spaces that serve as living laboratories, where curiosity and creativity bloom side by side with plants. Whether it's cultivating vegetables, planting flowers, or studying ecosystems, or garden beds and accessories are designed to make the process accessible and enjoyable. Through these green spaces, students develop a deeper understanding of sustainability, environmental stewardship, and the importance of growing and caring for living things.

- » *Nurturing a passion for gardening among youths.*
- » *Interactive gardening experience for students.*
- » *Empowering educators and students with outdoor living laboratories.*
- » *Grow curiosity and nurture creativity with plants.*

Reason to participate

Join us in sowing the seeds of knowledge and curiosity, as we inspire the next generation of gardeners and nature enthusiasts. Together, we can cultivate a greener, more sustainable future for all.
